Election Restriction

- 1. Applicants was informed in the petition decision of September 02, 2006 that "the Office actions of November 23, 2005 and those subsequently issued are hereby vacated." Applicant was also informed that "the new Office action might include a proper restriction requirement under 35 USC 121." Therefore, consistent with the petition decision, the following restriction is applied.
- 2. This application contains claims directed to the following patentably distinct species of the claimed invention: specie 1 (Figures 2-12), specie 2 (Figures 13-17).
- 3. The species are independent or distinct because:
 - Specie 1 (Figures 2-12); the connector has a channel on the stem portion.
 - Specie 2 (Figures 13-17); the connector has the shoulder (214).
- 4. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 3 7 CFR 1. 14 1: If claims are added after the election, applicant must indicate which are readable upon the elected -species. MPEP § 809.02(a).

Application/Control Number: 10/711,475

Art Unit: 2833

Should applicant traverse on the ground that the species-are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

- 5. Applicant has previously argued "...the Examiner has ignored that the claims are different definitions of the same disclosed subject matter, varying in breadth and scope.' MPEP §806.03" This, however, is disingenuous and inconsistent with the plain language of applicant's specification. More particularly, applicant clearly discloses one embodiment (species) in figures 2 through 12, and a separate embodiment (species) in figures 13 through 17. This is further evident by the language at the beginning of paragraph 54, which states "Regardless of which of the above embodiments is employed..."
- 6. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.
- 7. A telephone call was made to Mr. Timothy J. Ziolkowski to request an oral election to the above restriction requirement, but did not result in an election being made.
- 8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phuongchi Nguyen whose telephone number is (571) 272-2012. The examiner can normally be reached on 8:00AM-4:00PM.

Application/Control Number: 10/711,475

Art Unit: 2833

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paula Bradley can be reached on (571) 272-2800 ext 33. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
